RE: Letter Report - Surface Soil Sampling and Analytical Results - Original Pesticide Handling Area, US Naval Station, Mayport, Florida

Dear David:

I have reviewed the above letter report dated December 12, 1996 (received December 12, 1996). The report has generally addressed my previous concerns; however, because the site was a pesticide handling area, a representative ground water sample should be obtained and analyzed for the appropriate organic and inorganic constituents that may have been discharged from the site. Please submit the results of the analyses along with a revised recommendation for the site, if appropriate.

Thank you for the opportunity to review this report. If you have questions or require further clarification, please contact me at (904) 921-4230.

Sincerely,

James H. Cason, P.G.
Remedial Project Manager
